

We have put a time capsules from Noshiro local children inside the offshore wind tower of Akita offshore wind farm project!

2023/6/5

Marubeni Offshore Wind Development Co., Ltd.

Marubeni Offshore Wind Development Co., Ltd. (hereinafter referred to as "our company") is responsible for the operation and maintenance of the Akita offshore wind power generation business. There was a plan to put time capsules, which contain letters that the local children wrote to future themselves, inside offshore wind towers. It was planned to make local children feel attached to offshore wind farm. All the time capsules were placed inside the towers in May by our maintenance team.

Also we held special classes on the themes such as SDGs and renewable energy for elementary schools in Noshiro City to encourage them to think about their dream and global environment.

We will continue to do our best to provide environmental education and contribute to local community so that our business will be loved by everyone in the community.
